

NUTRI-CHECK NET
OPTIMISING CROP NUTRITION

Optimising Crop Nutrition

AIM: To establish a self-sustaining, multi-actor, thematic network which will improve the precision of crop nutrition across Europe by compiling nutrition decision tools, promoting farm-by-farm nutrient checking, and facilitating knowledge exchange amongst all relevant stakeholders.

Funded by
the European Union

UK Research
and Innovation

nutri-checknet.eu

Funded by the European Union and UK Research and Innovation (UKRI). Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union, European Commission or UKRI, neither the European Union, European Commission nor UKRI can be held responsible for them.

OBJECTIVES:

- Establish the NUTRI-CHECK NETWORK (NCN) to transform crop nutrition in Europe;
- Create an inventory of crop nutritional decision tools to summarise current knowledge & best practises;
- Evaluate crop nutritional decision tools;
- Develop the NCN Platform to act as a central point to share tools widely;
- Disseminate project outcomes widely, including liaison with other relevant EIP- AGRI Operational Groups and Thematic Networks throughout the duration of the project.

IMPACT:

- **Scientific:** Better informed research around crop nutrition decision making;
- **Economic:** Increased farm income and productivity introduced by improved crop nutrition decision making, improving agricultural resilience;
- **Environmental:** Reduction in nutrient losses associated with fertiliser use and nutrient recycling;
- **Societal:** Increased adoption of nutrition decision tools; increase in food security; decrease in food waste through improved crop quality; Improved awareness of benefits.

TARGET GROUPS:

Farmers

Advisors

Agri-food industry

Policymakers

Citizens and consumers

EIP-AGRI and CAP networks

PARTNERS:
